FOR: HIGH FREQUENCY FLIP CHIP :
MODULE AND ASSEMBLING METHOD
THEREOF

PROVISIONAL ELECTION

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the Restriction Requirement dated Nov. 6, 2003, Applicants provisionally elect with traverse Group I, Claims 1-15 directed to "a product" for further examination on the merits. Applicants reserve the right to file one or more divisional applications directed to the non-elected inventions.

The Restriction Requirement asserts that the application contains claims to distinct inventions. However, MPEP § 803 states the following:

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.

Although the outstanding Official Action identifies different search classifications, it is believed that the claims of the present application would have to be searched in only a small handful of sub-classes, all of which are in the same class and thus related. Furthermore, since electronic searching is commonly performed, a search may be made of a large number of, or

theoretically all, subclasses without substantial additional effort. Accordingly, Applicants respectfully traverse the Restriction Requirement on the grounds that a search and examination of the entire application would not place a *serious* burden on the Examiner, whereas it would be a serious burden on Applicants to prosecute and maintain separate applications.

Therefore, it is respectfully requested that the requirement to elect a single group be withdrawn, and that a full examination on the merits of Claims 1-20 be conducted.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
